Library Management System Project Overview

By PUVIYA OSWIN ALICE A Add a reaction

Project Description

The Library Management System is designed to simplify library operations by managing books, user accounts, borrowing and returning activities.

Project Objectives

- Provide easy book searching.
- Enable secure user login.
- Manage book borrowing and returning.
- Monitor library activities through a dashboard.

Project Development Tasks

The project includes five development tasks tracked using Jira Scrum.

Project Development Tasks

The project includes five development tasks tracked using Jira Scrum.

Project Progress

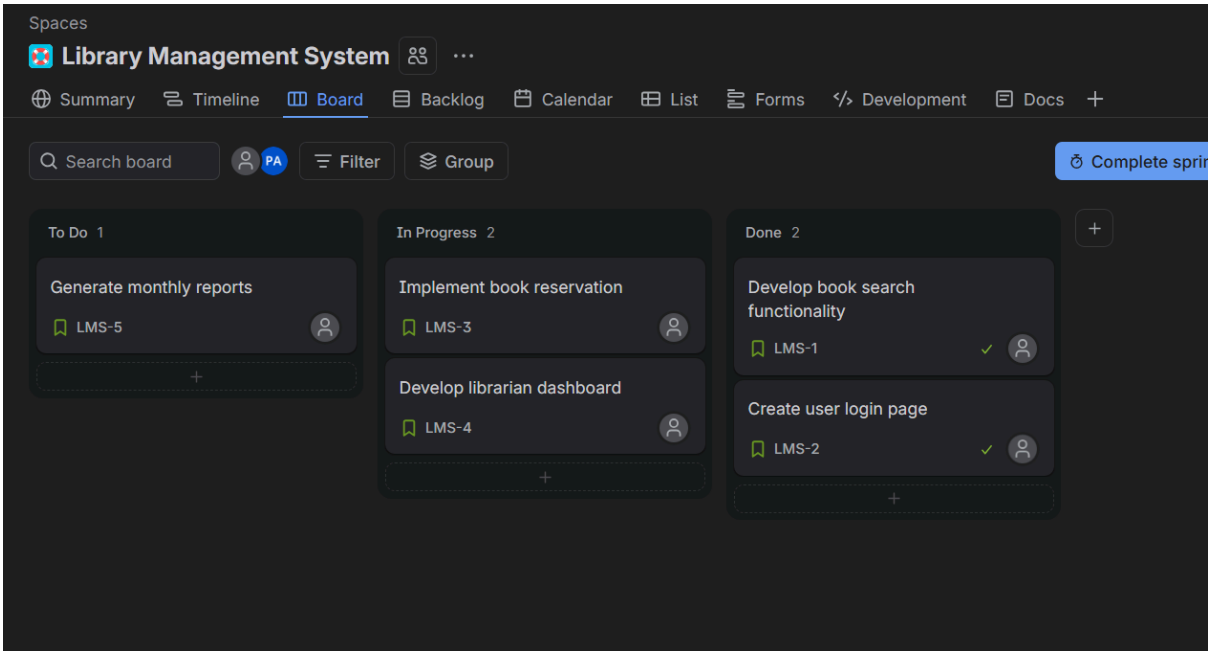

Overall Completion: 40% (2 out of 5 tasks completed).

Jira Task Tracking

The following section displays the development tasks and their current Jira statuses.

Key	Summary	Assignee	Priority	Status	Updated
LMS-1	Develop book search functionality		= Medium	Done	Nov 3, 2026, 21:05
LMS-2	Create user login page		= Medium	Done	Nov 3, 2026, 21:05
LMS-3	Implement book reservation		= Medium	In Progress	Nov 3, 2026, 21:05
LMS-4	Develop librarian dashboard		= Medium	In Progress	Nov 3, 2026, 21:05
LMS-5	Generate monthly reports		= Medium	To Do	Nov 3, 2026, 21:02
